

App Description

"Code Runner" is an app that helps reinforce the user's coding skills and familiarization with a specific programming language's syntax by filling up incomplete code snippets in a gamified format.

Similar Applications

This Application is mostly similar to the coding exercises that w3schools has for the end of each tutorial, but is designed to be gamified and more suitable for mobile devices.

Objectives of the app

01

Gamify the coding learning process

03

Implement a history system to show previous progress.

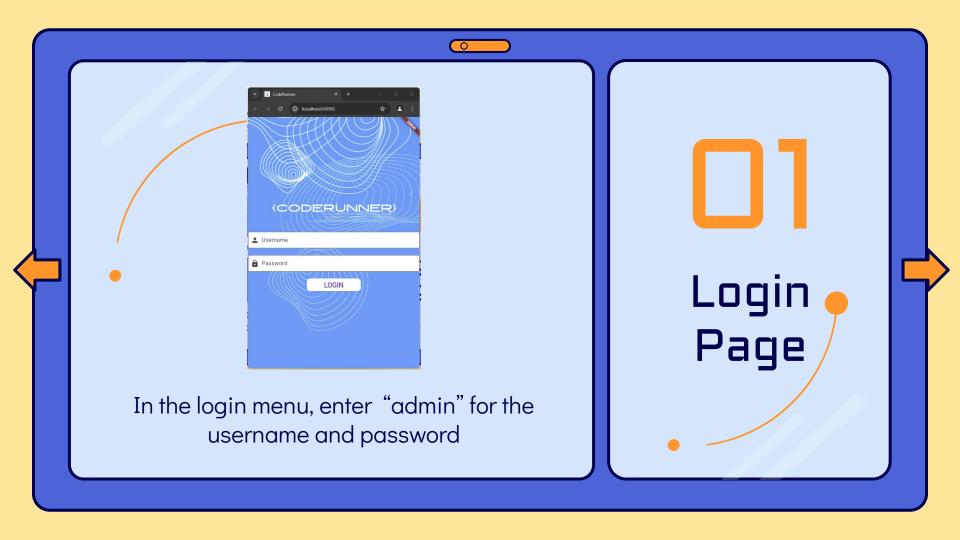

02

Implement multiple difficulties (easy, normal, hard, etc.)

04

Reinforce knowledge about programming languages

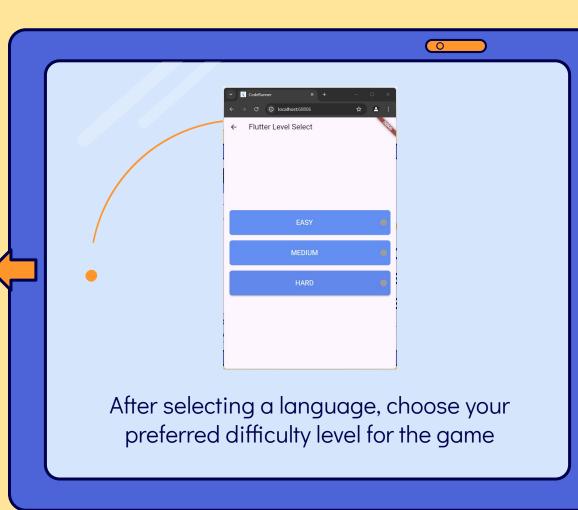

On this screen, select your preferred programming language to practice with

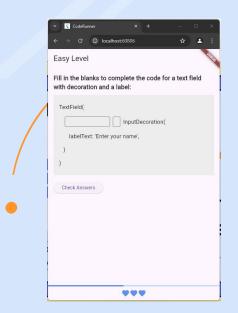

02

Language Select Screen

Difficulty
Select
Screen

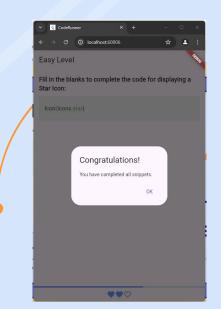

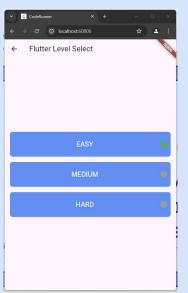

When playing the game, fill in the blanks of the coding snippets with your keyboard. For each level, the user is given 3 lives. Try to answer them within the time limit to prevent losing some.

04

Game Screen

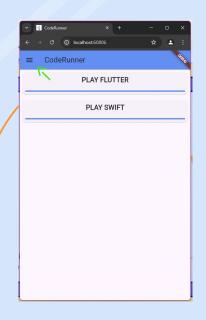

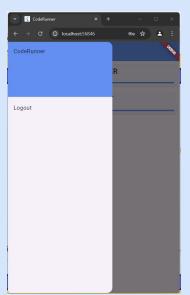

When you have reached the end of the level with enough hearts left, the level is "completed". This is indicated by the check mark next to the level difficulty in the select screen

Level Complete Screen 0

When logging out of the app, press the drawer button on the left side of the language select screen, and simply press log out to go back to the login page
